TECHNOLOGIES

HTML + CSS	JavaScript	SQL (esp. PostgreSQL)
Ruby + Rails	React + Redux	Redis
RSpec	Jest	Git
Sidekiq	Flow	Unix

EXPERIENCE

Software Engineer   Dec 2014 – Jan 2018
Demandbase   *San Francisco*
- Set up ETLs processing hundreds of thousands rows of data nightly to and from data warehousing services, business partners, and caches
- Quickly picked up React and Redux and turned around features for an advertising campaign management SPA, reducing the need to hire additional staff
- Proposed and implemented changes to stabilize a job scheduling system after recurring instability broke reporting displays in production
- Worked directly with salespeople to fulfill specific customer requests as well as with internal users to customize tools
- As a scrum master, led engineering teams in improving processes and developing standard practices

Software Engineer   Sept 2013 – Sept 2014
Perceptive Software   *San Francisco*
- Pushed new features through the stack (DB, BE, FE) of a 7-year-old video CMS
- Reimplemented parts of that CMS as a set of Ruby services communicating through RabbitMQ

Web Developer (contract)   Aug 2013 – Nov 2013
Dui Hua Foundation via Iconcells, LLC   *Remote*
- Built web forms with complex mappings to a database used to track the legal status of political prisoners

EDUCATION & TRAINING

cPrime   March 2016
